### Sub-task B5678 - Open the access port

1. Clean around the access port with isopropyl alcohol.
2. Ensure power has been locked out using [procedure C33345](#).
3. Grasp the handle firmly, and turn.
4. Carefully swing the access port open.
5. Secure open port with 0.073 binding wire and duct tape.
6. Procedure complete.
